

VERSATA DIGITAL SOLUTIONS

Connecting Innovative Technology with Opportunities in Nigeria

Technology Solutions • Digital Infrastructure • Smart Energy • Education Technology

Versata Digital Solutions is a Nigerian technology solutions and market-development company focused on connecting organisations with innovative products, technologies and solutions that address real business, institutional and infrastructure needs.

With operating experience since **2022** and corporate registration in **2025**, we work with customers, technology providers and international manufacturers to identify opportunities, develop projects and introduce practical technology solutions into the Nigerian market.

Based in Lagos, Nigeria. Serving organisations across Nigeria and developing opportunities within the wider West African market.

INTERNATIONAL TECHNOLOGY PARTNERSHIPS

Bringing Global Innovation Closer to the Nigerian Market

Versata Digital Solutions is actively seeking partnerships with selected international manufacturers and technology companies whose products can address opportunities within Nigeria.

We are particularly interested in innovative **physical technology products and complete technology solutions** that can be introduced through project-based market development, authorised reseller relationships, strategic representation and, where appropriate, distribution partnerships.

Our partnership approach is designed to develop markets progressively.

Our Partnership Model

01 — Market Development

We identify potential market opportunities and suitable customer segments.

02 — Business Development

We engage potential customers and develop genuine commercial opportunities.

03 — Project Development

We work with manufacturers and technical partners to develop solutions around identified customer requirements.

04 — Market Expansion

Successful partnerships can progress toward authorised reseller, integration or distribution relationships.

WHY NIGERIA?

Nigeria represents a significant market for innovative technology solutions across business, education, energy, infrastructure and industry.

Organisations increasingly require technologies that can help them:

- Improve operational efficiency
- Manage energy more effectively
- Modernise infrastructure
- Improve education and technical training
- Adopt innovative digital solutions
- Reduce operational challenges
- Improve productivity

Versata Digital Solutions seeks to connect these needs with appropriate international technology solutions.

WHO WE SERVE

Our potential customer and project segments include:

Corporate Organisations

Technology and infrastructure solutions for businesses and professional organisations.

Financial Institutions

Technology solutions supporting infrastructure, energy management and operational efficiency.

Educational Institutions

STEM, robotics, AI, smart learning and digital infrastructure solutions.

Manufacturing & Industrial Organisations

Technology supporting monitoring, energy management and operational efficiency.

Healthcare & Hospitality

Technology solutions for infrastructure, energy and operational requirements.

Government & Institutional Projects

Technology sourcing and project development for appropriate institutional requirements.

OUR APPROACH

Understand

We begin by understanding the customer's requirements and the specific problem that needs to be addressed.

Identify

We identify suitable technologies, products and potential technology partners.

Develop

We work with customers and manufacturers to develop commercially and technically appropriate opportunities.

Deliver

Where appropriate, we coordinate sourcing, procurement and implementation through suitable partners.

Build

We aim to build long-term relationships with customers and international technology providers.

OUR INTERNATIONAL PARTNER NETWORK

We are building relationships with selected international manufacturers and technology providers whose solutions have potential in the Nigerian market.

Our partnership interests include:

Smart Energy | Renewable Energy Technology | Education Technology | Robotics | Digital Infrastructure | Industrial Technology | Smart Solutions

We welcome discussions with manufacturers seeking qualified local market-development, reseller, project or distribution partners in Nigeria.

WHY VERSATA?

Local Market Focus

We are based in Lagos and focused on understanding opportunities within the Nigerian market.

Technology-Focused

Our business is centred on innovative technology products and practical solutions.

Market Development

We actively seek opportunities for international manufacturers rather than simply operating as a conventional trading company.

Project-Based Approach

We develop opportunities around actual customer requirements and projects.

Long-Term Partnerships

We aim to build sustainable relationships with manufacturers, technology providers and customers.

ABOUT VERSATA DIGITAL SOLUTIONS

Versata Digital Solutions began its operations in **2022** and was formally registered as a corporate organisation in **2025**.

Our business has evolved around the identification of technology opportunities, business development, technology sourcing and solutions for organisations within Nigeria.

Today, we are expanding our focus toward strategic partnerships with international manufacturers and technology providers seeking to develop opportunities in Nigeria and the wider West African market.
