Smart Energy & Energy Management

Innovative energy technologies designed to support more efficient, reliable, and sustainable energy use.

Digital Infrastructure & Technology Solutions

Technology products and infrastructure solutions supporting modern business and institutional environments.

Education Technology & Smart Learning

Physical technology, STEM, robotics, engineering, and smart-learning solutions for schools, training centres, and educational institutions.

Smart Collaboration & Workplace Technology

Technology designed to improve meetings, collaboration, communication, and workplace productivity.

Explore Solutions →

TECHNOLOGY PARTNERS

Discover the international manufacturers and technology companies whose products and solutions may create new opportunities within the Nigerian and West African markets.

Versata works to establish relationships with manufacturers seeking:

- Market-entry opportunities
- Local project representation
- Reseller and integration partnerships
- Distribution opportunities
- Product demonstrations
- Market development
- Customer and project development

Explore Technology Partners →

Note: Partner relationships will only be described as authorised, exclusive, or official where such status has been formally confirmed.

INDUSTRIES

Explore the sectors where innovative technology can create practical value.

Corporate & Commercial

Technology solutions for businesses, offices, and commercial organisations.

Education

Smart learning, STEM, robotics, engineering, and educational technology.

Energy

Smart energy, renewable-energy-related technologies, and energy management solutions.

Manufacturing & Industrial

Technology products and systems for industrial and operational environments.

Hospitality

Technology solutions supporting modern hospitality facilities and operations.

Healthcare

Technology opportunities applicable to healthcare facilities and related organisations.

Government & Public Sector

Technology solutions supporting institutions, infrastructure, and public-sector projects.

Real Estate & Infrastructure

Technology for modern buildings, facilities, developments, and infrastructure projects.

PROJECTS & OPPORTUNITIES

Explore technology opportunities being developed for the Nigerian market.

Versata focuses on identifying practical applications for innovative international products and connecting them with potential customers, projects, institutions, and organisations.

Our project-oriented approach allows us to explore opportunities without requiring every product to be stocked locally in advance.
